

Dear FCC:

I have read petition RM-10352 and would encourage you to adopt it into rulemaking.

The authors of the petition have done an excellent job providing data, from multiple sources, that show the increase in activity on the 160 meter band. Based on personal experience of operating on this band for over 20 years, I fully expect this trend to continue. Therefore, it is becoming increasingly important that action be taken which will allow all users of the 160 meter band to peacefully coexist. This petition in my opinion, is reasonable and will serve the amateur community well. Without this type of action, we are likely to see an increase in conflicts between various modes of operation which in turn, will only diminish the overall usefulness of this piece of radio spectrum. Thank you for your consideration.
